

# One platform powered by logs

sumo logic

Scalable, AI-powered insights, cloud-native security, and more – all in one place

## Sumo Logic Log Analytics Platform

Keeping applications reliable and secure is becoming increasingly challenging, requiring ever more data to drive root cause investigation and analysis. When it's time to solve problems, those issues need more cross-functional and organizational collaboration than ever before.

The top challenges supporting complex business-critical applications are managing the large volumes of data and then sharing it in real-time across all the required organizations to solve problems. Stop limiting how much data you collect or fighting about whose siloed data is correct.

Development, security, and IT operations teams need a single source of truth fueled by logs. Sumo Logic's AI-powered Log Analytics Platform with Flex Licensing unifies all your logs from across your entire organization to power true DevSecOps without breaking your budget.

Act faster, make better decisions, and thrive in complex digital environments. With a unified interface and unlimited users, all your teams can share views and ensure the performance and security of your code that runs the world.

### Monitor, troubleshoot, and secure your apps and infrastructure

Log analytics powers thousands of use cases, but the most common solutions are:

- Application reliability
- Infrastructure monitoring
- Security log analytics
- Real-time investigation and troubleshooting

## Succeed with the world's most powerful and scalable log analytics platform

Get an integrated log analytics platform as your single source of truth across your development, security, and operations teams for faster insights to action.

- Scalable, cloud-native, multi-tenant platform purpose-built for structured and unstructured logs
- Flex Licensing decouples log ingest from budgets, eliminating data gaps during troubleshooting
- Machine learning and advanced analytics reduce noise, tune, identify, investigate, and resolve issues faster
- Mo Copilot included at no additional cost for simple natural language search and visualization
- Secure by design with investments in attestations including FedRAMP Moderate; SOC 2, Type 2; HIPAA; PCI DSS; ISO27001
- Real-time threat intelligence data and customizable, automated playbooks
- Unlimited users
- Consumption-based pricing as search analytics are executed
- Hundreds of apps and integrations with OOTB dashboards and saved searches
- Comprehensive free training
